

Company Profile

Vision

Sigma IT has always provided the most innovative solutions in order to help our clients in whatever capacity that they need the most. Ensuring our clients' continued success and growth is the main reason we offer our services.

Mission Statement

Our mission statement is to build the best professional teams possible, partner with the leaders in the industry in order to provide the best training and technology services.

Objective

Sigma IT has made it a strategic priority to attract and retain the top IT and Telecommunications engineers and technicians in the market to implement innovative projects, work with emerging technologies, participate in high level training, and serving early-adopter, high profile clients who value their systems and the services we provide.

Philosophy

- Enhance customer's KNOWLEDGE.
- Guarantee service's high QUALITY.
- Contribute to development by DIVERSITY.

Sigma IT is a premium services provider specializing in Training and Advanced Services. With offices in Egypt and Saudi Arabia, we serve the diverse needs of the MEA and Europe region.

At Sigma IT we understand that top-rate professionals working in efficient teams are the heart of any company. We have created teams of the most skilled professionals and gave them the right tools and environment to provide their best.

Combining unparalleled experience, comprehensive capabilities across all major industries and business functions, Sigma IT collaborates with clients to help them become high-performance businesses.

We offer our expertise in training, consulting, technology and manpower outsourcing to help our clients perform at the highest levels so they can create sustainable value for their customers and stakeholders.

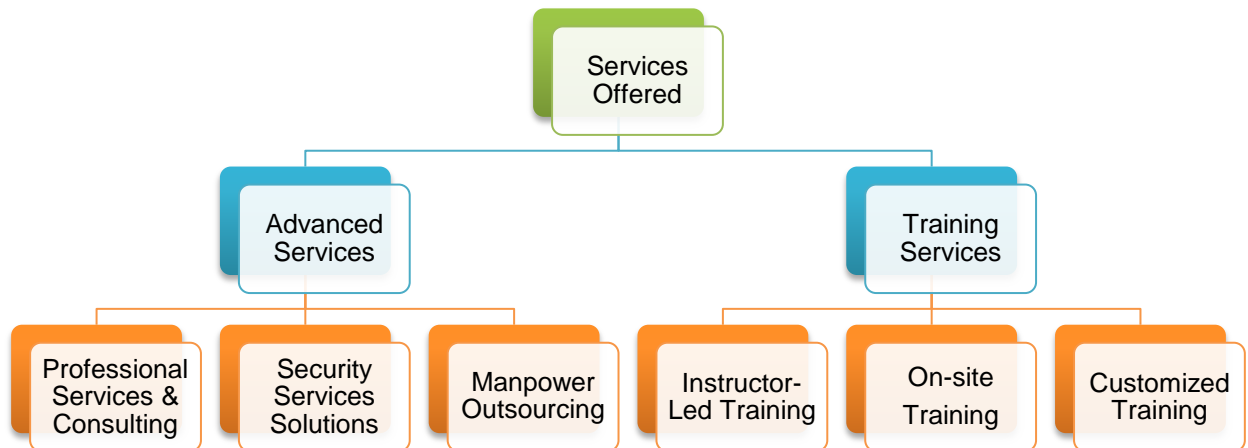

We have designed and developed a series of Information Technology services aimed at providing the most complete range of disciplines. They cover:

□ **Advanced Services:**

Our full spectrum includes Professional Services and Manpower Outsourcing allowing our clients to be the extension of our teams while maximizing their resources.

□ **Training Services:**

Relying on experienced professional trainers we provide unique collection of both standard and customized training courses.

1. Advanced Services

Advanced Services allow Sigma IT to undertake day-to-day management responsibility from our clients as a strategic method for improved, effective and efficient operations. This means that our clients can offload as much or as little of the projects or systems development tasks to our teams as they need.

Sigma IT offers a set of advanced services that ensure many advantages to our clients. The key benefits are:

- 1) Customer peace of mind
- 2) Single point of contact for all projects and tasks
- 3) Single supplier instead of multiple vendors
- 4) Defined Service Level Agreements
- 5) Known costs for management and project that is clearly defined on the outset
- 6) Allows our clients to avoid costs of building management & reporting systems and teams
- 7) Lower Total Cost Ownership (TCO) for client

1.1. Professional Services and Consulting

Through our Advanced Services Partnership with Cisco, our consulting services can help you find the right solution, and implement it so it will grow with you as you grow. Our consulting services are the gateway to helping our clients understand what is possible and what they can achieve. Whether it is a messaging solution to connect your enterprise or a team collaboration solution aimed at a specific discipline, our consulting team can help you understand what you can achieve and give you tools to achieve it.

1.2. Security Services Solutions (SSS)

Every organization uses different types of security solutions depending on its security posture. Security posture is the way information security is implemented. Security assessments are risk-based assessments, due to their focus on vulnerabilities and impact. Security assessments rely on three main assessment methods that are inter related. Combined, the three methods can accurately assess the Technology, People, and Process elements of security.

A security assessment is performed to identify the current security posture of an information system or organization. The assessment provides recommendations for improvement, which allows the organization to reach a security goal that mitigates risk.

Sigma IT Security services:

1. Internal Vulnerability Assessment
2. External Vulnerability Assessment
3. Intrusion Detection Assessment
4. Penetration Testing
5. Wireless Security Survey

1.3. Manpower Outsourcing

In the current economic climate, businesses need to be able to respond to the unprecedented market conditions and make vital changes both quickly and dramatically. Sigma IT can help businesses not only survive but thrive in this environment.

Outsourcing can help your business with cost cutting and immediate savings. The goal is to help your organization emerge from the downturn in a stronger competitive position.

2. Training Services

Sigma IT offers premium education and learning services that utilize top professionals. We attract and develop the best talent for our business, organizing our people into result-oriented teams. We also provide an environment that motivates students to learn and achieve their best.

2.1. Training Methodologies

With a view to provide the most flexible learning contents and maximize student knowledge, we offer the following training methodologies according to the results of **Training Needs Assessment**:

2.2.1. Instructor-led Training

With the best facilities of their kind, and a highly-skilled team of management and instructors, Sigma IT provides courses and tracks that cover the leading technologies, and systems. Through our partnerships with industry leaders in information technology and internetworking, we offer certified training and testing across a wide range of products and systems.

We are very proud to offer an environment that promotes learning and offers the students many comforts. Many students have described their experience with us as being “part of a family”.

2.2.2. On-Site Training

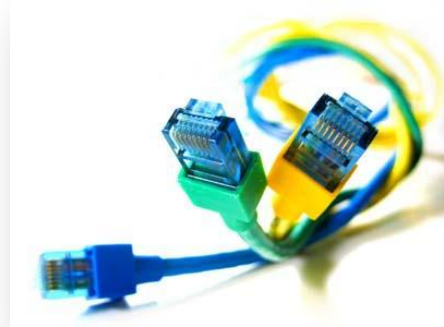

Another leading innovation from Sigma-IT, On-Site Training allows us to deliver the same quality training at the client’s site. Designed to train teams together, On-Site Training is customized to each client and delivered on-site at the client’s premises. We have a highly experienced team that will work with the client to make sure the site is equipped to fully meet the needs of the course being delivered.

Another great benefit of On-Site Training is that the client's team can be trained directly on the system they will ultimately work with. This allows a high degree of practical, hands-on training in a real-world system

2.2.3. Customized Training

Offering the final degree of flexibility, Customized Training allows our clients to send their teams to Sigma IT for training with customized materials, duration, delivery and courses. This means that the client decides the best time for the course, what the duration should be how many students to have and the blend of courses that will make the final learning experience.

2.2. Training Vendors

Sigma IT is always looking forward to diverse the provided trainings by choosing world's most prestigious training vendors, following are a sample of them:
